Hi and thanks for purchasing from Unio Creative Solutions.

About The File:

Enjoy the Commercial Version of 15 premium Adobe Lightroom presets compatible with desktop and mobile app. Improve your photo shoot and boost your blog or Instagram profile, with a click.

Now available to purchase from your favorite design market, our products are widely available.

You will be able to retouch your photos (.raw, .jpg, .png, .tiff, and .dng) with easy to use professional presets, and obtain high-quality photos with unique tones and styles.

These presets were specifically designed to work with Lightroom CC, Lightroom Classic CC, and are also compatible with Adobe Lightroom Mobile, available for iOS and Android. Adobe Lightroom Mobile does not require any subscription.

Specifications:

- Format: .xmp (Desktop), .dng (Mobile)
- Software Requirement: Lightroom Classic CC (7.5 or higher), Lightroom CC, Adobe Lightroom Mobile (iOS/Android)
- Included: 1 Preset for Desktop and Mobile
- Documentation: Step-by-step PDF guide

Recommendations:

- *Please mind that each DSLR or DSLM camera is different and therefore every photo result. Some presets will work really well with only minor adjustments but NOT every photo will look good with all presets.*
- *Tweak your photo to achieve the ideal exposure and temperature before applying a preset, since each photo is different.*

Continues on next page

- These presets are specifically designed to work with high definition RAW files. JPEG and PNG are also supported but due to the nature of these compressed photo files, the photo may appear with some artefacts that will require some adjustment to the preset.

How-to edit Files:

These presets are compatible with Adobe Lightroom Classic (7.5 and later), Adobe Lightroom CC, and Adobe Lightroom Mobile.

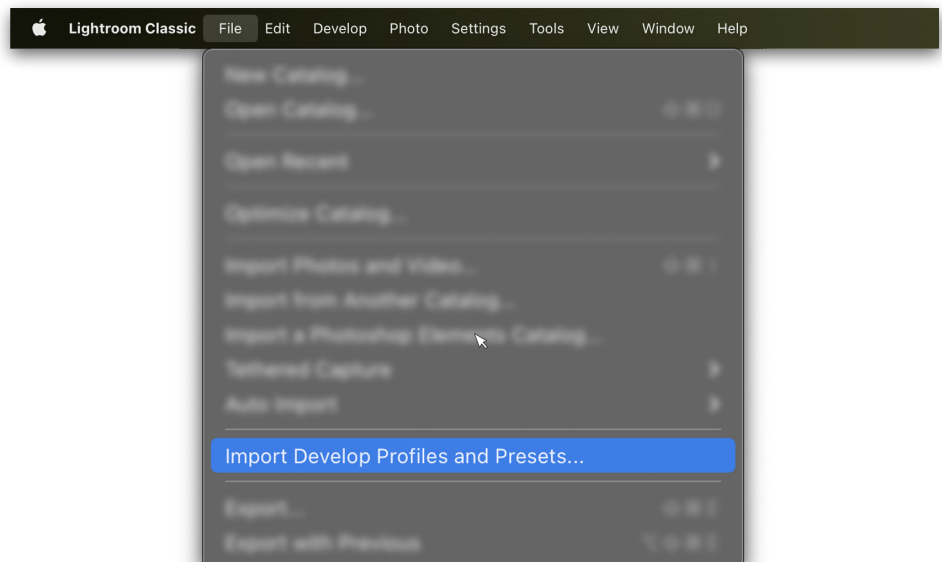

Please note that Adobe Lightroom Classic v6.0 does not support .xmp presets.

How to install the presets into Lightroom Classic and Lightroom CC

- Extract the **xmp-desktop** folder, from the archive you have just downloaded, in the same folder path of **presetspackone-unio.zip**
- Launch your **Lightroom Classic or Lightroom CC** app
- Import your images into the library, if you do not have any of them

Troubles? <https://helpx.adobe.com/lightroom-cc/using/add-photos.html>

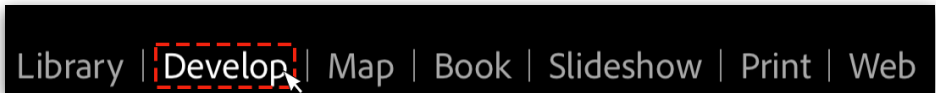

- Click **File** and then **Import Develop Profiles and Presets**

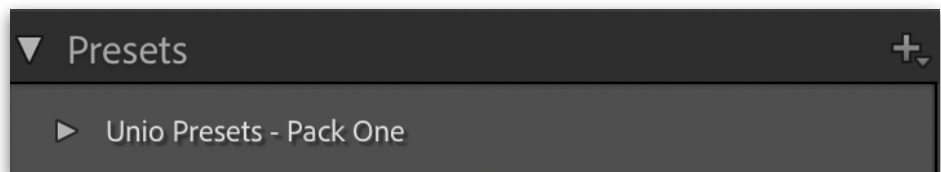

- Now you'll be required to switch back to the extracted **xmp-desktop** folder and select it.

Continues on next page

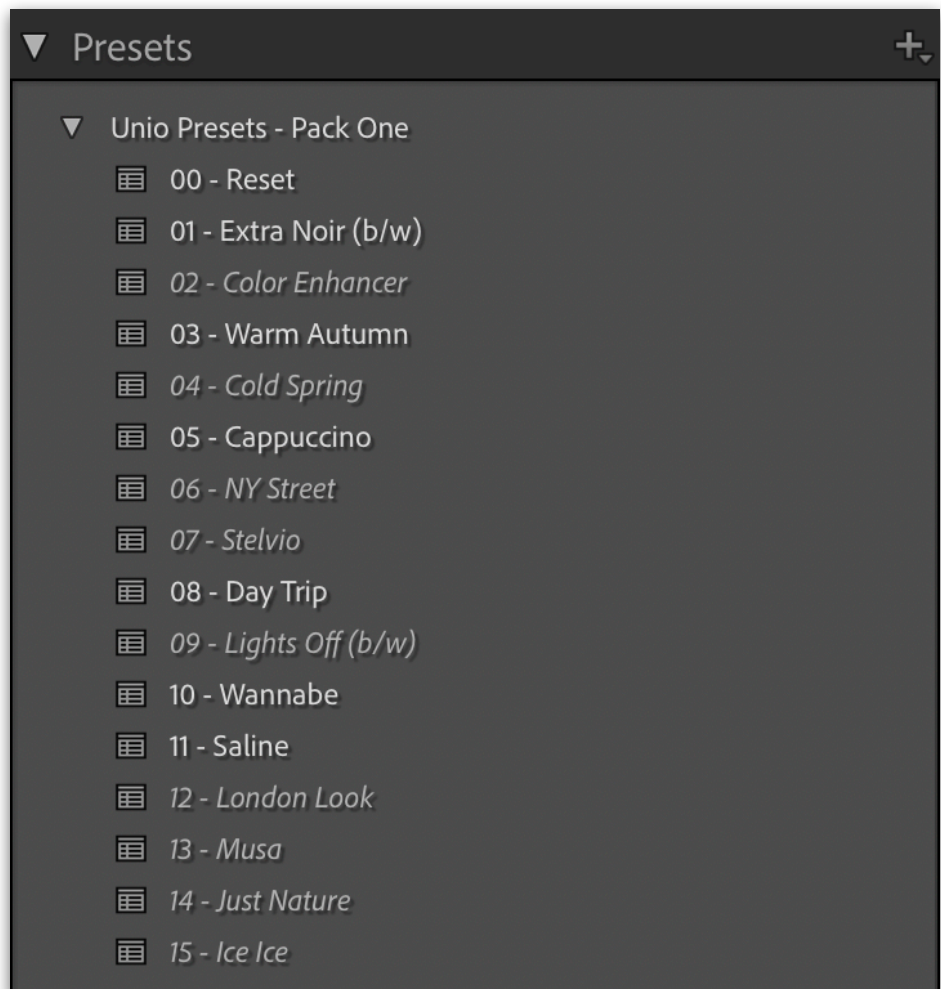

- Select all the presets by hitting **Cmd+A (MacOs)** or **Ctrl+A (WinOS)** and click **Import**.
- Go to the **Develop Module**, as shown.

- The presets can be used in Lightroom now and you will find them in the **Presets** tab under **User Presets**.

- Once installed, expand the **Unio Presets - Pack One** and select the preset you would like to apply to your image. Job done.

If you don't have the mobile app it's time to download it:

[Adobe Lightroom App for iPhone](#) / [Adobe Lightroom App for Android](#)

How to sync Lightroom CC presets to the mobile app.

✱ **If you have access to Lightroom CC on the computer, follow the previous mini guide *How to install the presets into Lightroom Classic and Lightroom CC.***

Adobe Lightroom CC or Classic will automatically sync your presets to any device that shares the same Adobe Creative Cloud Id.

In order to fix sync issues, make sure you are logged in with your Adobe account then access your CreativeCloud preferences. Now check the desktop Lightroom CC app as well as each mobile device that shares your Adobe Id.

✱ **If you do not have the desktop version of Adobe Lightroom and just want to sync the presets to your mobile phone, here's how:**

- extract the **dng-mobile** folder from the archive you have just downloaded in the same folder path of **presetspackone-unio.zip**
- transfer the **.dng** files to your phone. If you have an Android phone use [AirDrop](#), [Google Drive](#), or [Dropbox](#) to complete this task. If you have an iPhone then use AirDrop or any of the previously named cloud services, including iCloud.

Troubles? *Depending on your phone, DNG files could show up on your camera roll as blank photos. Ignore this issue, it won't affect our operations.*

- launch the **Lightroom Mobile** app and import the **.dng** files from your camera roll

Troubles? *Import photos in Lightroom for mobile (iOS)*

Import photos and videos in Lightroom for mobile (Android)

- go into the album containing your newly imported DNG files.
- open the first photo in the row.
- tap on the 3 dots at ⋮ the top right of the screen and then select **Create Preset**.
- give your preset a name, or use the same naming we adopted, and add it into a **Preset Group** named **Unio Presets - PackOne** for your convenience.
- save the preset by tapping on the icon ✓ at the top right corner of your screen.

Continues on next page

- repeat this process for every imported DNG file, as you will need to save each preset separately.

If you want to use your new presets.

- Open a new photo from your recents snaps. Tap the **Presets** tab in the menu on the lower right, select one of the 15 new presets and apply it. Please consider to *apply some minor tweaks to exposure and temperature.*

If you have any question or you're facing some technical issues, simply e-mail us at unio.ask@gmail.com

Feel free to follow us, we're on Facebook, Twitter, Instagram, Pinterest and Dribbble!

Thanks again for buying!
