it's easy :)**

How to edit smart object :

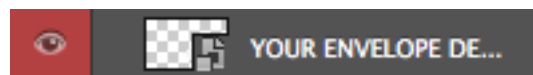

1. Open the .psd file inside Photoshop.
2. Double-click on the Smart Object layer you want to edit.
3. Inside the .psb file you can find a placeholder template use / demonstration. You can edit the template or drag & drop your own design in place.
4. After you are finished Save and close .psb window. The changes will apply in the main PSD file.
